Full-Stack Developer with 9+ years of experience developing web and mobile applications using React JS, React Native, and Java with Spring Boot. I consider myself self-taught and I'm always ready for trying new languages and technologies. Aiming to contribute to building first-class software applying good practices and making excellent designs. I would like to work in projects related to artificial intelligence.

EXPERIENCE

Galileo Financial Technologies, Full-Stack Developer — October 2022 - Present

- Reduced customer wait times at Banco Agrícola (El Salvador) by developing new features for the bank's web application. Bank employees can now easily contract services and open savings accounts for customers in just a few steps.
- Decreased banking transaction times for multiple Ecuadorian companies by developing a virtual banking web application for Banco Bolivariano (Ecuador). This application enables companies to efficiently manage payroll, transfers, and credit card payments.

Tech Stack: React JS, Redux, Redux Saga, Typescript, SASS, Java, Spring Boot, PostgreSQL, Microsoft SQL Server, Docker.

Jardines de Esperanza, Middle Developer — November, 2018 - October 2022

- Increased home sales by 20% by developing a mobile application that allows salespeople to calculate client payments based on selected products. The app also prints receipts using a portable Bluetooth thermal printer.
- Improved task tracking efficiency by 35% by creating a web application that enables team leaders to assign tasks and monitor their status—pending, in progress, or completed.
- Reduced portable printer acquisition costs by 60% by enhancing an existing mobile app to support generic printers instead of Zebra printers.

Tech Stack: Bluetooth Thermal Printer SDK's, React JS, React Native, HTML, Typescript, CSS, Android, ASP.NET Web API's, Java, Spring Boot, Spring Security, JPA, JDBC Template, Microsoft SQL Server.

Intelisoft SA, Junior Developer — April, 2015 - October, 2018

- Increased efficiency in shrimp larvae monitoring by 50% by developing web and mobile applications that remind workers to take parameter measurements and record them in the app. The company CEO can generate reports based on collected data via the web application.
- Reduced communication delays between patients and doctors by 30% by developing a mobile app that allows patients, nurses, and doctors to send video messages and make video calls.

Tech Stack: React JS, React Native, HTML, Typescript, CSS, Android, iOS, Java, Spring Boot, Spring Security, JPA, PostgreSQL.

Escuela Superior Politécnica del Litoral, Trainee Developer — May, 2014 - March, 2015

- Streamlined the university document approval process by 30% by creating a web application that enables students to complete forms related to their graduation process and submit them for online approval or rejection by their tutors.

Tech Stack: PHP Laravel, Blade Templates, Eloquent ORM, MySQL.

SKILLS

Programming Languages: Advanced: Javascript, HTML, Java; Intermediate: Typescript, PHP; Basic: C#.

Frameworks Tools (Frontend): Advanced: React JS, Redux, React Native; Intermediate: Tailwind CSS, SASS, jQuery, NextJS,

Frameworks Tools (Backend): Advanced: Spring Boot; Intermediate: Laravel, Node JS, Express JS, CI/CD.

Data Base: Advanced: Microsoft SQL Server, PostgreSQL; Intermediate: MySQL.

Tools: Advanced: Android Studio, Visual Studio Code, XCode, Jira, Git, Intermediate: Postman, Docker, Github, Gitlab.

Agile: Advanced: Scrum.

Languages: Advanced: English; Native: Spanish.

EDUCATION

Escuela Superior Politécnica del Litoral – Guayaquil, Ecuador. *Computer Science Engineering*, Nov 2010 - Oct 2016.

CERTIFICATIONS

SEO Certification – Centro Tecnológico de Entrenamiento y Capacitación (CETEC). 2020.
